

Environmental Policy

It is the aim of ISO Management Services International LLP to continually strive for reduced emissions and impacts on the environment.

We will strive to achieve this by:

- Planning audits together in order to reduce travel requirements;
- Seeking technological advances within the business in order to reduce the volume of paper generated and energy consumed;
- Recycle inks, paper, cardboard and plastics within the office;
- Manage our energy usage;
- Ensure legislative requirements are maintained ensuring we remain legally compliant;
- Using localised auditors where possible;
- Ensuring staff are fully trained and aware of our commitments to the environment and how their role has an effect on our objectives;

This policy defines our commitment to the environmental, is known and understood by all within our company, and provides the philosophy upon which all our services are planned, developed and monitored.
